Objective

I am a Web Developer who has experience and specialized training in today's modern Front End Development Technologies. Passionate about shaping the future of the web, I am seeking a position that will allow me to grow while developing dynamic applications, utilize my past experience as a system administrator and a tech support analyst to be a well-versed and unique asset to any team.

RELEVANT SKILLS

LANGUAGE AND PRACTICES

HTML5
CSS3
JavaScript
JSX
Git and GitHub
JSON
AJAX
RESTful Api's

FRAMEWORKS AND LIBRARIES

Backbone JS
React JS
Underscore JS
Bootstrap
Sass
Handlebars
jQuery

CURRENT PROJECT

I am working a contract with MedProcure, LLC as their Front-End Developer working on developing the front end of their new Supply Chain Management Software using HTML5, CSS3, JavaScript, jQuery and AJAX calls to a Laravel Back End on an Apache Server running Cassandra.

One of the applications created is a dynamic meal planning application where schools can offer to parents as a resource for food menus and nutritional information in a multi-view platform that is visually appealing and responsive.

EDUCATION
