JSX
Git and GitHub
JSON
AJAX
RESTful Api's

FRAMEWORKS AND LIBRARIES

Backbone JS
React JS
Underscore JS
Bootstrap
Sass
Handlebars
jQuery

PROJECTS

U-GRUB

<https://frazierr2.github.io/final-project/>

The goal for U-Grub is to allow you, the user, to record your restaurant experience and later recall the things you liked, didn't like, food you ate and more. If you are traveling, no worries, we have you covered there also. Simply go to the Search Local Eateries tab and type in your location and you will be given a list of local restaurants with all the information you will need to determine the best place to eat.
