JSON
AJAX
RESTful Api's

FRAMEWORKS AND LIBRARIES

Backbone JS
React JS
Underscore JS
Bootstrap
Sass
Handlebars
jQuery

PROJECT

U-GRUB

<https://frazierr2.github.io/final-project/>

The goal for U-Grub is to allow you, the user, to record your restaurant experience and later recall the things you liked, didn't like, food you ate and more. If you're traveling, no worries, we have you covered there also. Simply go to the Search Local Eateries tab and type in your location and you will be given a list of local restaurants with all the information you will need to make an informed decision.

EDUCATION

Front-End Engineering

The Iron Yard, September 2016 - December 2016
